

According to the University of Wisconsin, 96% of all plant life is comprised of:

45% Carbon
6% Hydrogen
45% Oxygen

The remaining 4% is made up of:

Nitrogen
Phosphorus
Potassium
Calcium
Magnesium
Sulfur
Iron
Manganese
Copper
Zinc
Boron
Molybdenum
Chlorine

- ④ Promotes the activity of beneficial bacteria
- ④ Restores the soil's biological balance
- ④ Increases the carbon level in the soil
- ④ Increases root mass
- ④ Reduces salts and nitrates in the soil
- ④ Decreases water usage
- ④ Reduces contaminants in the soil
- ④ Reduces insect and disease damage
- ④ Balances the soil pH
- ④ Promotes richer color
- ④ Denser, thicker blades
- ④ Easy to use
- ④ Quick results

Better *than* Green

Unlike chemical fertilizers and traditional organic amendments, EnviroYard™ treats carbon, hydrogen, and oxygen as macronutrients, the building block of all plant life.

EnviroYard™ is a food grade liquid nutrient package, designed to replenish the carbon-based diet all plants need for maximum production.

Using our precision blend of energized carbon, will unlock every plant's potential by re-energizing the soil with carbon along with a balanced nutrient package. EnviroYard™ also acts as a detoxifier in the soil, replacing the need for harmful chemicals as well as buffering salt build-up. By removing these salts,

EnviroYard™ allows maximum root penetration and nutrient uptake during the growth of the plant.

Better root systems boost Sugar Flow™, resulting in increased quality and color.

EnviroYard™
